Nova AI Voice Platform

Customer User Guide

A complete walkthrough of every screen in your Nova AI portal — from signing in, to dispatching AI voice calls, tracking results, and managing your subscription.

Prepared for customer onboarding · 2026

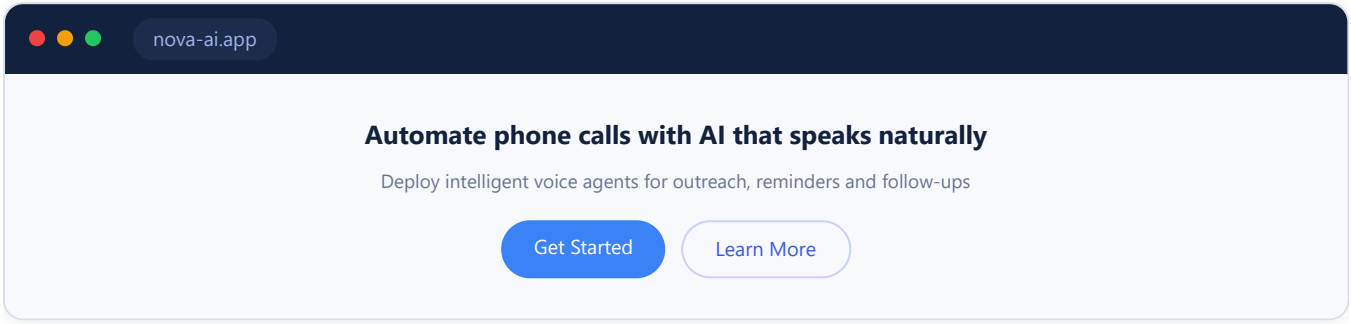

Table of Contents

1. **Getting Started** — Landing Page, Creating an Account & Signing In
2. **Dashboard Overview** — Stats, Call Volume Chart & Recent Activity
3. **Making a Single Call** — The Call Dispatcher
4. **Bulk Calling Campaigns** — The Bulk Dialer
5. **Call History** — Tracking Every Call
6. **Transcripts** — Reading Full Conversations
7. **Settings & Subscription** — Plans & Billing
8. **AI Analytics Assistant** — Ask Questions About Your Calls
9. **Quick Reference & Support**

1. Getting Started

1.1 Landing Page

Visit your Nova AI web address to reach the public landing page. This page introduces the platform and gives you a single entry point — the **Get Started** button — to reach the sign-in screen.

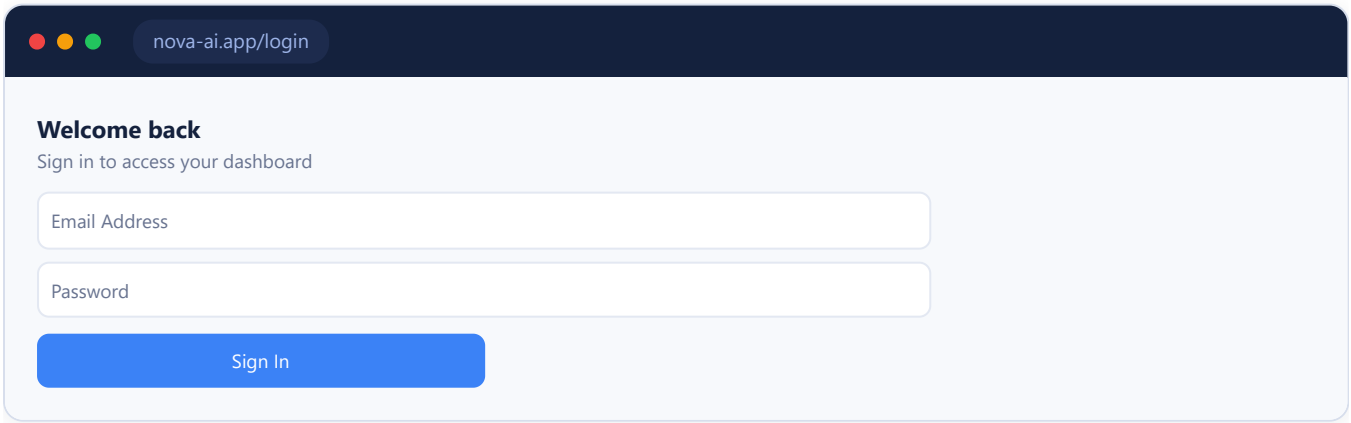

1.2 Creating an Account

Click **Get Started** to open the login screen, then switch to the sign-up form.

1. Click **Get Started** on the landing page (or go directly to the Login screen).
2. Select **Create your account**.
3. Enter your **Full Name**, **Phone Number**, **Email Address** and a **Password**.
4. Submit the form. A confirmation email is sent to your inbox.
5. Click the confirmation link in the email, then return to the Login screen to sign in.

1.3 Signing In

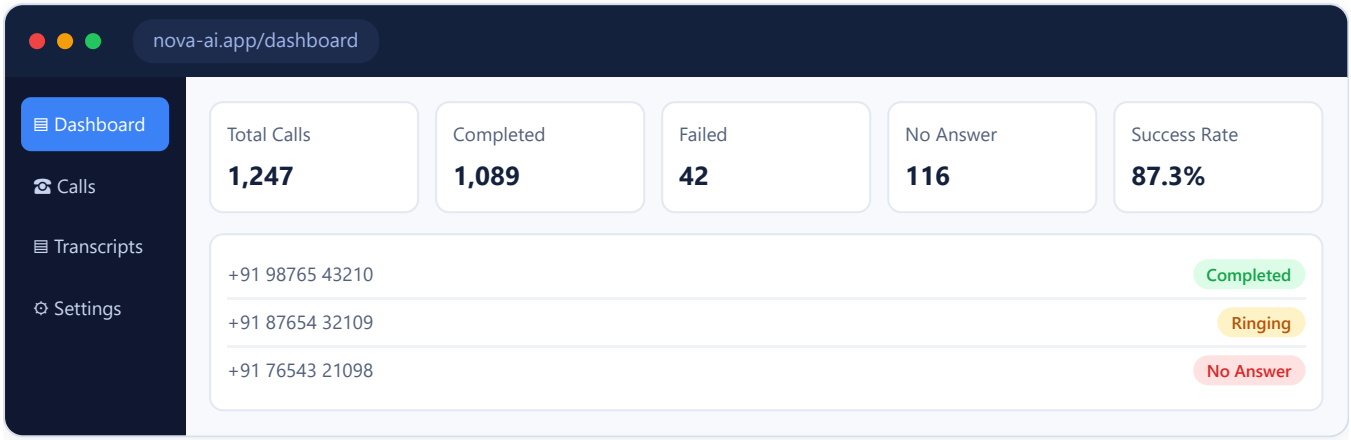

Enter your registered **email** and **password**, then click **Sign In**. You'll be taken straight to your Dashboard.

> **Tip:** Use the sun/moon icon (top-right of the login screen and dashboard) to switch between dark and light themes at any time.

2. Dashboard Overview

After signing in you land on the **Dashboard** tab — your home screen. A left-hand sidebar lets you move between the four main areas of the portal: Dashboard Calls Transcripts Settings .

2.1 Stat Cards

Six cards summarize your account activity for the current period:

Card	What it shows
Total Calls	All calls dispatched this month, with % change vs. the previous period.
Completed	Calls that connected and finished successfully, plus completion rate.
Failed	Calls that could not be completed (technical/carrier failure).
No Answer	Calls where the recipient did not pick up.
Total Minutes	Total call minutes consumed and the average minutes per call.
Success Rate	Percentage of calls completed successfully, compared to last month.

2.2 Subscription Card

Shows your current plan and live usage bars for **Calls Used** and **Minutes Used** against your monthly quota. An **Upgrade Plan** button jumps straight to the Settings screen.

2.3 Call Volume Chart

A bar chart comparing completed vs. failed calls over time. Use the dropdown to switch the range between **Last 7 days**, **Last month**, **Last 6 months**, and **Last year**. Hover any bar for exact numbers.

2.4 Recent Activity

A live table of your most recent calls (phone number, time, duration, status). Click **View all calls** to open the full Calls screen.

3. Making a Single Call

Open the **Calls** tab in the sidebar to reach the **Call Dispatcher** — used to place one AI-powered call at a time.

1. Enter the recipient's **phone number** (with country code, e.g. +91 98765 43210).
2. Write what the AI agent should say/discuss in the **prompt** box — or describe your goal in the **brief** field and click **Generate** to have AI write the call script for you.
3. Choose a **voice** and **language** for the agent.
4. Optionally click the **star** icon to save a prompt for reuse, or open **Saved Prompts** to load one you saved earlier.
5. Click **Dispatch Call** to place the call immediately.
6. Once connected, click **View Live Transcript** to watch the conversation unfold in real time.

> **AI Prompt Generator:** Don't want to write a script from scratch? Type a short brief (e.g. "Remind the customer about their appointment tomorrow at 5 PM") and Nova AI drafts a ready-to-use conversation prompt for you.

4. Bulk Calling Campaigns

Below the single Call Dispatcher on the **Calls** screen is the **Bulk Dialer** — for running the same script across many contacts in one go.

1. Paste a list of phone numbers, one per line (or comma-separated) into the numbers box.
2. Write or AI-generate the shared call **context/prompt** that every call will use.
3. Review the automatically detected contact count.
4. Click **Launch Campaign** to dispatch calls to every number in the list.
5. Each number's dispatch result (dispatched / failed) appears in a results list below.

> **Note:** Bulk campaigns consume your plan's call and minute quota just like single calls — check your Subscription card before launching a large batch.

5. Call History

Also on the **Calls** screen, **Call History** lists every call your account has made — phone number, date/time, duration, direction (inbound/outbound) and final status (Completed, No Answer, Failed, Ringing). Use it to audit past campaigns or follow up on unanswered calls.

6. Transcripts

Open the **Transcripts** tab in the sidebar to review the full text of past conversations between the AI agent and your customers. Select any call to read the turn-by-turn dialogue, useful for quality review or verifying what was promised on a call.

7. Settings & Subscription

Open the **Settings** tab to manage your plan.

Plan	Price	Calls / month	Minutes / month
Basic	₹999	200	500
Pro (Popular)	₹2,999	1,000	2,000
Enterprise	₹9,999	10,000	20,000

1. Choose a plan and click **Upgrade**.
2. Complete payment securely through the Razorpay checkout window (card, UPI, netbanking supported).
3. Your new quota is applied immediately and reflected on the Dashboard's Subscription card.

8. AI Analytics Assistant

A floating chat assistant is available on every dashboard screen (bottom-right corner). Click it to ask plain-English questions about your call data — for example:

> "How many calls did I complete last week?" · "What's my pickup rate this month?" · "Which numbers haven't answered yet?"

The assistant reads your account's live call data and answers instantly, without needing to build a report manually.

9. Quick Reference & Support

Screen	Purpose
Dashboard	At-a-glance stats, usage, and recent call activity.
Calls	Dispatch single calls, launch bulk campaigns, browse call history.
Transcripts	Read full text of past AI conversations.
Settings	View/upgrade your subscription plan and billing.
Analytics Assistant	Chat-based Q&A about your call data (all screens).
